

KAIROS Whitepaper

KAIROS Whitepaper Version 1.0 | June 2025

Executive Summary

KAIROS (\$KRS), developed by Chrono Corp, is the first Solana-based cryptocurrency infused with an Alternate Reality Game (ARG) narrative. Designed to merge storytelling with decentralized finance, \$KRS offers holders real-time Solana rewards funded through transaction taxes. With a capped supply of 1 billion tokens and community-centric mechanics, KAIROS sets a new benchmark for narrative-driven crypto projects.

Mission and Vision

Mission: To pioneer an immersive crypto experience by integrating time-travel ARG elements with tangible Solana-based rewards and a strong, community-led ecosystem.

Vision: To evolve KAIROS into a cultural and financial movement where holders are not only investors but active participants in a mysterious and engaging chronicle, powered by NFT drops, game integrations, and exclusive content.

Problem and Solution

Problem: Many cryptocurrencies lack an emotional or narrative hook, leading to weak community engagement and short-term investor interest.

Solution: KAIROS solves this through a compelling time-travel ARG storyline that blurs fiction and reality. This keeps holders engaged while rewarding them with real Solana distributions and the opportunity to be part of a living, evolving story.

KAIROS Whitepaper

Token Utility and Use Case

- Rewards: 3.5% of every transaction is converted into Solana and distributed to holders with a minimum of 1,000 \$KRS. Payouts occur every 15 minutes, with a max of 1% of the total pool per holder.
 - Marketing & Burns: 1.5% of each transaction goes towards marketing campaigns and periodic token burns to enhance scarcity.
 - Future Utility:
 - Pre-launch NFT collection to fund liquidity.
 - Post-launch NFT collection exclusive to \$KRS holders.
 - Potential development of merchandise and a video game (under discussion).
 - DAO and community-governed content rollout in future phases.
-

Tokenomics

- Name: KAIROS
- Symbol: \$KRS
- Network: Solana
- Total Supply: 1,000,000,000 (1 billion)

Transaction Breakdown

- 3.5% Solana Rewards
- 1.5% Marketing & Token Burns

Token allocation

- 20% Team (2% released monthly over 10 months)
 - 15% Pre-Launch NFT Airdrops
 - 15% Liquidity (100% locked for 6 months)
 - 10% Development (50% locked for 6 months)
 - 40% Community Distribution

KAIROS Whitepaper

Launch Details

- Public countdown begins: June 16, 2025
 - Token Launch Date: July 4, 2025 via distributesol.io
 - 15% of liquidity will be added and locked for 6 months
 - Exchange listings and influencer campaigns to follow post-launch
-

Community Engagement

KAIROS is centered on its holders. Through contests, ARG missions, trivia, and community content, users become integral pieces of the story. Participation earns both Solana rewards and lore-based NFT assets.

Team and Governance

Chrono Corp is led by a team of creatives and blockchain veterans. While initially centralized for efficiency, long-term governance goals include DAO voting on features, NFT integration, and roadmap expansions.

Legal and Risk Disclaimer

\$KRS is a fictional narrative-driven project with real crypto utility. While the time-travel story enhances user experience, all investment involves risk. There are no guaranteed returns. Do your own research (DYOR).
